Govt. Degree College Beerwah

Digital India Initiative

- **Digital India is a flagship programme of the Government of India with a vision to transform India into a digitally empowered society and knowledge economy.**
- **The initiative was officially launched by Prime Minister Narendra Modi on July 1, 2015. It encompasses various projects and programs aimed at leveraging technology to improve governance, enhance access to information, and empower citizens**

Vision

The vision of Digital India is to create a digitally inclusive and empowered India, where citizens have access to affordable and reliable digital technologies and services, and where digital technology is used to drive innovation, growth, and development.

Digital India Initiative

Vision Areas

1. Digital Infrastructure as a core utility to Every Citizen

- Availability of high speed internet as a core utility for delivery of services to citizens
- Cradle to grave digital identity that is unique, lifelong, online and authenticable to every citizen
- Mobile phone & bank account enabling citizen participation in digital & financial space
- Easy access to a Common Service Centre
- Shareable private space on a public cloud
- Safe and secure cyber-space

Digital Infrastructure
as a Core Utility to
Every Citizen

Governance &
Services on
Demand

Digital
Empowerment
of Citizens

Digital India Initiative

Vision Areas

2. Governance & Services on Demand

- Seamlessly integrated services across departments or jurisdictions
- Availability of services in real time from online & mobile platforms
- All citizen entitlements to be portable and available on the cloud
- Digitally transformed services for improving ease of doing business
- Making financial transactions electronic & cashless
- Leveraging Geospatial Information Systems (GIS) for decision support systems & development.

Digital Infrastructure
as a Core Utility to
Every Citizen

Governance &
Services on
Demand

Digital
Empowerment
of Citizens

Digital India Initiative

Vision Areas

3. Digital Empowerment of Citizens

- Universal digital literacy
- Universally accessible digital resources
- Availability of digital resources / services in Indian languages
- Collaborative digital platforms for participative governance
- Citizens not required to physically submit Govt. documents / certificates

Digital Infrastructure
Governance &
as a Core Utility to
Every Citizen

Services on
Demand

Digital
Empowerment
of Citizens

THE FOCUS IS TO BRING TRANSFORMATION TO REALIZE

India Tomorrow

Pillars of Digital India

Pillar 1. Broadband Highways

Broadband for all Rural

- Coverage: 250,000 GP
- Timeline: December 2016
- CAPEX: Rs 32,000 Cr
- Nodal Dept: DoT

1yr: 50,000 GP
2yr: 100,000 GP
3yr: 100,000 GP

Broadband for all Urban

- Virtual Network Operators for service delivery.
- Mandate communication infrastructure in new urban development and buildings.

Changes in Rules to facilitate.

National Information Infrastructure

- Coverage: Nationwide
- Timeline: March 2017
- Cost: Rs 15,686 Cr
- Nodal Dept: DeitY

Integration of SWAN, NKN, NOFN. To be implemented in 2 years

Pillar 2. Universal Access to Mobile connectivity

Universal Access to mobile connectivity

- **Coverage:** Remaining uncovered villages (~ 42,300 villages)
- **Timeline:** FY 2014-18
- **Cost:** Rs 16,000 Cr
- **Nodal Dept:** DoT

Ongoing Programme
Increased network penetration & coverage of gaps

DIGITAL INDIA

Pillar 3. Public Internet Access Programme – National Rural Internet Mission

CSCs –

made viable, multi-functional end-points for service delivery

- Coverage: 2,50,000 villages (now 130,000)
- Timeline: 3 Years - March 2017
- Cost: Rs 4750 Cr
- Nodal Agency: DeitY

Ongoing Programme

Reach of Govt. services to all GPs

Post Offices

to become
Multi-Service Centres

- Coverage: 1,50,000 Post Offices
- Timeline: 2 Years
- Nodal Agency: D/o Posts

This should be
long term vision
for POs

Pillar 4. e-Governance: Reforming Government through Technology

- Government **Business Process Re-engineering** using IT to improve transactions
 - Form Simplification, reduction
 - Online applications and tracking, Interface between departments
 - Use of online repositories e.g. school certificates, voter ID cards, etc.
 - Integration of services and platforms – UIDAI, Payment Gateway, Mobile Platform, EDI
- **Electronic Databases** – all databases and information to be electronic, not manual
- **Workflow automation** inside government
- **Public Grievance Redressal** - using IT to automate, respond, analyse data to identify and resolve persistent problems – largely process improvements
- **To be implemented across government - critical for transformation.**

Pillar 5. eKranti - Electronic Delivery of Services

- **Technology for Education – e-Education**
 - All Schools connected with broadband
 - Free wifi in all schools (250,000)
 - Digital Literacy program
 - MOOCs – develop pilot Massive Online Open Courses
- **Technology for Health – e-Healthcare**
 - Online medical consultation
 - Online medical records
 - Online medicine supply
 - Pan-India exchange for patient information
 - Pilots – 2015; Full coverage in 3 years
- **Technology for Planning**
 - GIS based decision making
 - National GIS Mission Mode Project
- **Technology for Farmers**
 - Real time price information
 - Online ordering of inputs
 - Online cash, loan, relief payment with mobile banking
- **Technology for Security**
 - Mobile Emergency Services
- **Technology for Financial Inclusion**
 - Mobile Banking
 - Micro-ATM program
 - CSCs/ Post Offices
- **Technology for Justice**
 - e-Courts, e-Police, e-Jails, e-Prosecution
- **Technology for Security**
 - National Cyber Security Co-ordination Center

Ongoing Programme (NeGP) – will be revamped to cover these elements

Pillar 6. Information for All

- **Online Hosting of Information & documents**
 - Citizens have open, easy access to information
 - Open data platform
- **Government pro-actively engages through social media** and web based platforms to inform citizens
 - MyGov.in
 - **2-way communication** between citizens and government
- **Online messaging** to citizens on special occasions/programs
- **Largely utilise existing infrastructure** – limited additional resources needed

Pillar 7. Electronics Manufacturing

Target NET ZERO IMPORTS by 2020

- **Target NET ZERO Imports is a striking demonstration of intent**
- **Ambitious goal** which requires coordinated action on many fronts
 - Taxation, Incentives
 - Economies of Scale, Eliminate cost disadvantages
 - **Focused areas – Big Ticket Items**
 - FABS, Fab-less design, Set top boxes, VSATs, Mobiles, Consumer & Medical Electronics, Smart Energy meters, Smart cards, micro-ATMs
 - Incubators, clusters
 - Skill development
 - Government procurement
- There are many ongoing programs which will be fine-tuned.
- **Existing Structures inadequate to handle this goal. Need strengthening.**

DIGITAL INDIA

Pillar 8. IT for Jobs

Train people in smaller towns & villages for IT sector jobs

- Coverage: 1 Crore students
- Timeline: 5 years
- Cost: Rs 200 Cr for weaker sections
- Nodal Agency: DeitY

New Scheme

IT ready workforce

IT/ITES in NE

- Scope: Setting up of BPO per NE State
- Coverage: NE States
- Nodal Agency: DeitY

ICT enabled growth in NE

Train Service Delivery Agents to run viable businesses delivering IT services

- Coverage: 3,00,000
- Timeline: 2 Years
- Nodal Agency: DeitY

Ongoing

Skilled VLEs and Viable CSCs

Telecom service providers to train rural workforce to cater to their own needs

- Coverage: 5,00,000
- Timeline: 5 Years
- Nodal Agency: DoT

Telecom ready workforce

DIGITAL INDIA

Pillar 9. Early Harvest Programmes

IT platform for messages

- Coverage: Elected representatives, All Govt employees
- 1.36 Cr mobiles and 22 Lakh emails
- Mass Messaging Application developed

Targeted Mass
messaging since
July 14

Government Greetings to be e-Greetings

- Basket of e-Greetings templates available
- Crowd sourcing of e-Greetings thru MyGov
- e-Greetings Portal ready by 14 August 2014

1st e-Greeting
from PM on 15th
Aug 2014

Biometric attendance

- Coverage: All Central Govt. Offices in Delhi
- Operational in DeitY & Initiated in Urban Development
- On-boarding started in other depts
- Procurement of devices – tender issued

To be completed
by Oct 2014

Significance of Digital India Campaign

1. Transparency: The transparency that has come due to Digital India has eliminated corruption at various levels adversely affecting the poor and the middle class.
2. Direct Benefit Transfer: In the last eight years, more than Rs 23 lakh crore has been transferred through Direct Benefit Transfer (DBT) to beneficiaries.
3. The trio of Jan Dhan, Mobile and Aadhaar, or JAM: It has provided maximum benefit to the poor and the middle class.
4. Ending corruption: The Digital India campaign has helped save Rs 2.25 lakh crore from falling into the wrong hands in the past eight years.
5. Eliminating middle-men: Digital India has saved money for the common man by ending the network of middle-men
6. Digital India helped the government tackle the crisis arising out of the Covid pandemic: CoWin and Aarogya Setu are two mobile applications that helped provide 200 crore vaccine doses.
7. Ending digital divide: Digital India has also helped bridge the digital divide that exists between rural and urban India.

Key Achievements

1. Increased broadband penetration: Broadband penetration has increased from 15% in 2014 to 70% in 2023.
2. Increased mobile connectivity: The number of mobile internet subscribers has increased from 120 million in 2014 to 700 million in 2023.
3. Increased e-governance adoption: The number of e-government transactions has increased from 200 million in 2014 to 3.2 billion in 2023.
4. Increased digital literacy: The number of digitally literate citizens has increased from 120 million in 2014 to 800 million in 2023.
5. Over 135.5 crore residents enrolled with Aadhar number
6. Over 400 digital services being offered through around 5.21 lakh CSC centres.
7. DigiLocker has more than 13.7 crore users and more than 562 crore documents are made available through it.

Challenges

1. Gender gap: Indian women are 15 per cent less likely to own a mobile phone and 33 per cent less likely to use mobile internet services than men.
 - Women constitute only one-third of internet users in India.
2. Skewed penetration: Among states, Maharashtra has the highest internet penetration, followed by Goa and Kerala, while Bihar has the lowest, followed by Chhattisgarh and Jharkhand.
3. India's global rank: According to the UN's e-participation index (2022), which is a composite measure of three important dimensions of e-government, namely provision of online services, telecommunication connectivity and human capacity, India ranks 105 out of 193 nations.
4. Online safety: According to a survey, more than half of young women have experienced violence online, including sexual harassment, threatening messages and having private images shared without consent.
 - Women's rights defenders and female journalists were targeted for abuse more than most.
5. Inadequate artificial intelligence: The third threat comes from badly designed artificial intelligence systems that repeat and exacerbate discrimination.

Challenges & Changes Needed

- **Program on this scale never conceived**
- **Each Pillar/program has own challenges**
- **Human Resource Issues**
 - NIC - not equipped for a fraction of this task (obsolesce) - needs revamping & restructuring
 - DeitY – needs program managers – at least 4 more officers at senior levels
 - **Ministries – Need a Chief Information Officer / Chief Technology Officer (CIO/CTO)**
 - Could begin with CIOs 10 major Ministries
 - Can be anyone – from within or outside government
 - To be patterned as AS & FAs – dual reporting
- **Financial Resource Issues**
 - Mostly structured around ongoing programs : Better focus, need some restructuring
 - Some others are process improvements or better utilisation of resources
 - A few new programs may be needed – particularly in Electronics manufacturing and Skill Development
- **Coordination Issues**
 - Program covers many other departments
 - Need commitment and effort
 - Leadership and support critical for success

DIGITAL INDIA: INFRASTRUCTURE

- Aadhaar identity platform is one of the key pillars of 'Digital India', wherein every resident of the country is provided with a unique identity or Aadhaar number.
- The largest biometrics based identification system in the world, Aadhaar is a strategic policy tool for social and financial inclusion, public sector delivery reforms, managing fiscal budgets, increase convenience and promote hassle-free people-centric governance.
- It is unique and robust enough to eliminate duplicate or fake identities and may be used as a basis/primary identifier to roll out several Government welfare schemes and programmes for effective service delivery thereby promoting transparency and good governance.
- Over 135.5 crore residents enrolled with Aadhar number
- Website. <https://uidai.gov.in>

DIGITAL INDIA: INFRASTRUCTURE

- Bharat Broadband Network Limited is a special purpose vehicle set-up under Companies Act by the Government of India with an authorized capital of Rs. 1000 cr.
- It has been mandated to create the National Optical Fiber Network (NOFN) in India.
- A total of around 2,50,000 Gram Panchayats spread over 6,600 Blocks and 641 Districts are to be covered by laying incremental fiber.
- Website. <http://www.bbnl.nic.in/index.aspx>

DIGITAL INDIA: INFRASTRUCTURE

- CSC scheme is one of the mission mode projects under the Digital India Programme. CSCs are the access points for delivery of essential public utility services, social welfare schemes, healthcare, financial, education and agriculture services, apart from host of B2C services to citizens in rural and remote areas of the country.
- It is a pan-India network catering to regional, geographic, linguistic and cultural diversity of the country, thus enabling the Government's mandate of a socially, financially and digitally inclusive society.
- Over 400 digital services being offered through around 5.21 lakh CSC centres.
- Website. <https://csc.gov.in/>

DIGITAL INDIA: SERVICES

- Unified Payments Interface (UPI) is a real-time payment system developed by the National Payments Corporation of India (NPCI).
- It facilitates inter-bank transactions through a single mobile application, regardless of the user's bank. UPI offers a seamless and secure way to send and receive money, making it a popular choice for digital payments in India.
- About Bharat Interface for Money (BHIM) is an app that makes payment transactions simple, easy and quick using Unified Payments Interface (UPI). It enables direct bank to bank payments instantly and collect money using a Mobile number or Payment address. Bharat Interface for Money app is currently available on Android and it is downloadable from Google Playstore, for smart phones.

DIGITAL INDIA: SERVICES

About. Bharat Interface for Money (BHIM) is an app that makes payment transactions simple, easy and quick using Unified Payments Interface (UPI). It enables direct bank to bank payments instantly and collect money using a Mobile number or Payment address. Bharat Interface for Money app is currently available on Android and it is downloadable from Google Playstore, for smart phones.

The e-Hospital application is a Hospital Management Information System (HMIS) for internal workflows and processes of hospitals. This one-stop solution helps in connecting patients, hospitals and doctors on a single digital platform. The application is developed based on the global healthcare standards like HL7, SNOMED-CT, ICD10 and LOINC, and Meta Data and Data Standards (MDDS) published by the Ministry of Health & Family Welfare (MoHFW). e-Hospital is made available to Central Government/ State Government/ Autonomous/ Cooperative hospitals on cloud through SaaS (Software as a Service) model.

DIGITAL INDIA SERVICES:

e-Granthalaya

A Digital Agenda for Automation and Networking of Government Libraries
from NATIONAL INFORMATICS CENTRE, Government of India

e-Granthalaya is an Integrated Library Management Software developed by National Informatics Centre,(NIC), Department of Electronics & Information Technology. The application is useful for automation of in-house activities of libraries and to provide various online member services. The software provides built-in Web OPAC interface to publish the library catalogue over Internet. The software is UNICODE Compliant, thus, supports data entry in local languages.

e-Panchayat is an e-Governance initiative for the rural sector providing comprehensive software solution attempting automation of Gram Panchayat functions. It is a platform for panchayat representatives to connect with rest of the world, which aims to bring out the local voices by empowering the local communities to showcase and share local social, cultural and economic practices, stories and challenges.

The first step in the Digital AIIMS project was taken in January 2015 with the creation of an effective linkage between AIIMS, Unique Identification Authority of India (UIDAI) and the Ministry of Electronics and Information Technology (MeiTY). A unique health identification number for every patient visiting AIIMS was generated on an Aadhar platform. The Unique Health Identification Number gave every Patient visiting AIIMS a Digital Identity.

DIGITAL INDIA SERVICES:

The eOffice product aims to support governance by ushering in more effective and transparent inter and intra-government processes. The vision of e-Office is to achieve a simplified, responsive, effective and transparent working of all government offices. The Open Architecture on which eOffice has been built, makes it a reusable framework and a standard reusable product amenable to replication across the governments, at the central, state and district levels. The product brings together the independent functions and systems under a single framework.

DIGITAL INDIA: EMPOWERMENT:

- AEPS is a bank led model which allows online interoperable financial inclusion transaction at PoS (MicroATM) through the Business correspondent of any bank using the Aadhaar authentication.
- It is a payment service empowering a bank customer to use Aadhaar as his/her identity to access his/ her respective Aadhaar enabled bank account and perform basic banking transactions like balance enquiry, cash deposit, cash withdrawal, remittances through a Business Correspondent.

DIGITAL INDIA: EMPOWERMENT:

GET INVOLVED

Participate in nation-building activities

- The citizen-centric platform empowers people to connect with the Government & contribute towards good governance.
- MyGov platform is a unique path breaking initiative which was launched by the Hon'ble Prime Minister of India, Shri Narendra Modi.
- It is a unique first-of-its-kind participatory governance initiative involving the common citizen at large.
- The idea of MyGov brings the government closer to the common man by the use of online platform creating an interface for healthy exchange of ideas and views involving the common citizen and experts with the ultimate goal to contribute to the social and economic transformation of India.

DIGITAL INDIA: EMPOWERMENT:

MHRD

Department of Higher Education

Ministry of Human Resource Development
Government of India

National Mission on Education through ICT (NME-ICT)

- The National Mission on Education through Information and Communication Technology (NMEICT) has been envisaged as a Centrally Sponsored Scheme to leverage the potential of ICT, in teaching and learning process for the benefit of all the learners in Higher Education Institutions in any time any where mode. It is a landmark initiative of the Ministry of Human Resource Development to address all the education and learning related needs of students, teachers and lifelong learners.

DIGITAL INDIA: EMPOWERMENT:

Learning Management System (LMS) is a software application for the administration, documentation, tracking, reporting and delivery of electronic courses (e-learning) and training programs. As a capacity building tool, LMS facilitates efficient administration of e-learning and training for various government officials both at centre and states/union territories. It has the objective of enhancing knowledge and skills of users as per their roles envisaged in the e-Governance Competency Framework (eGCF).

In line with the Government's Digital India initiative, this project has created a framework to make school books accessible in digital form as e-books to be read and used on tablets and laptops. The main idea is to bring various publishers (free as well as commercial) and schools together on one platform. In addition to the portal, a back-end framework to facilitate the organization and easy management of such resources has been developed, along with the web-based applications that can be installed on tablets for navigating the framework.

DIGITAL INDIA: EMPOWERMENT:

Developed by NCERT, e-Pathshala showcases and disseminates all educational e-resources including textbooks, audio, video, periodicals and a variety of other print and non-print materials through website and mobile app. The platform addresses the dual challenge of reaching out to a diverse clientele and bridging the digital divide (geographical, socio-cultural and linguistic), offering comparable quality of e-contents. All the concerned stakeholders such as students, teachers, educators and parents can access e-books through multiple technology platforms i.e. mobile phones (android, iOS and Windows platforms), and tablets (as e-pub) and on web through laptops and desktops (as flipbooks).

DIGITAL INDIA SERVICES:

A close-up photograph of a right hand holding a sleek, black, cylindrical pen. The hand is positioned as if about to write, with the thumb and index finger gripping the pen. The skin is fair and shows some texture. The background is plain white. On the far left edge, there is a vertical strip of text from another page, which is partially cut off.
